CEO & Managing Partner

What is Generative AI?

9:30AM - 10:00 AM

Center Stage

What do you mean when you say "AI"?

Brace yourself to become the 'AI Whisperer' among your friends as we debunk some common 'AI' myths.

In this session, we'll cut through the thick fog of AI misinformation and bring clarity to what most people mean by 'AI'.

DAVID PHILLIPS

FasterGlass

Founder & Innovation Provocateur

**A Human-Centered Approach
to Generative AI**

11:00 AM - 11:30 AM

Center Stage

Generative AI may be relatively new, but adapting to disruption is not.

In this session, we'll examine how Human-Centered Design can help leaders navigate the opportunities and challenges GenAI presents.

AFTERNOON SCHEDULE

-  **1:00 PM - 1:30 PM** **Go Fund Yourself: How to Start Your AI Journey**  **Center Stage**
-  **1:30 PM - 4:30 PM** **AI Expo: Afternoon Showcases** **Conference Rooms**
-  **2:00 PM - 2:30 PM** **Navigating the Legal Issues of Using Generative AI**  **Center Stage**
-  **3:00 PM - 3:30 PM** **Are You Ready for AI?**  **Center Stage**
-  **3:45 PM - 4:00 PM** **Showcase Showdown!** **Center Stage**
-  **4:00 PM - 5:00 PM** **Happy Hour!** **Cafe & Tap House**

BONUS! Stick around for VentureSouth's Monthly Meeting from 5-7pm

Denise Beachley
CIO

Frank Wanicka
CTO

Kingsmen Software

Go Fund Yourself: How to Start Your AI Journey

1:00 PM - 1:30 PM

Center Stage

Starting your journey in our AI Lab is easy. Whether you're a division head wanting to explore AI to improve your business or an entrepreneur looking to disrupt with new technology, Kingsmen's AI Lab can help get you started.

John Yates

Morris, Manning & Martin
Attorney

Navigating the Legal Issue of Using Generative AI

2:00 PM - 2:30 PM

Center Stage

How can a tech company & investors reduce their legal exposure when using AI?

This session provides practical guidance for tech/software companies & investors to reduce the risk of legal liability through careful due diligence & understanding the evolving AI legal issues.

Kevin Carney
Kingsmen Software
Managing Partner

Are You Ready for AI?

3:00 PM - 3:30 PM

Center Stage

Ready or not, here it comes!

AI will impact your business, but to what extent? And are you prepared from a business strategy, technology adoption, talent & expertise, and policy & governance perspective?

Transcript 00:08:12

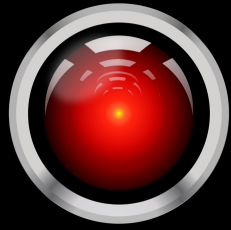

- Jazmine Simmons 11:23 AM
Welcome to the team, Babak!
- Marie Beaudouin 11:23 AM
Great to meet you. Really looking forward to working with you.
- Babak Shammas 11:23 AM
Thanks for the intro, Charlotte. It's a pleasure to meet you all today.
- Marie Beaudouin 11:23 AM
So what did you all think of today's kickoff meeting for the new building project?
- Jazmine Simmons 11:23 AM
It's very exciting. I've already been thinking about some ways the buildings can be designed.
- Daniela Manders 11:23 AM
We're off to a great start. Let's keep the momentum going.
- Babak Shammas 11:23 AM
I'm going to follow up after this

The Brilliance and Weirdness of ChatGPT

A new chatbot from OpenAI is inspiring awe, fear, stunts and attempts to circumvent its guardrails.

By [Kevin Roose](#)

Dec. 5, 2022

Like most nerds who read science fiction, I've spent a lot of time wondering how society will greet true artificial intelligence, if and when it arrives. Will we panic? Start sucking up to our new robot overlords? Ignore it and go about our daily lives?

OpenAI announces an API for ChatGPT

ChatGPT can now see, hear, and speak

We are beginning to roll out new voice and image capabilities in ChatGPT. They offer a new, more natural type of interface by allowing you to have a voice conversation or show ChatGPT what you're talking about.

OpenAI Likely to Announce "Jarvis" at DevDay

Speculations are rife that at the upcoming [OpenAI DevDay](#) conference, the company might just announce their first complete autonomous agent. People call it a "swarm of bees clicking around on the internet", fundamentally changing the it. This definitely points to the recent [Global Illumination acquisition by OpenAI](#), where it training AI agents in a gamified simulation.

Though the conference is focused on developers, and would possibly include a lot of developer-focused announcements, the release of Jarvis officially looks like in the works.

AI Breakfast @AiBreakfast · Follow

When OpenAI releases Autonomous Agents, it will be like an intelligent swarm of bees clicking around on the internet.

Sending emails, negotiating, making products, purchases, fulfilling orders, etc.

It will fundamentally change the internet, and this cannot be overstated.

Anthropic releases Claude 2 second-gen AI chatbot

Kyle Wiggers @kyle_l_wiggers / 9:30 AM EDT • July 11, 2023

Claude 2

Jul 11, 2023 · 4 min read

Talk to Claude

We are pleased to announce [Claude 2](#), our new model. Claude 2 has improved performance, longer responses, and can be accessed via API as well as a new public-facing beta website, [claude.ai](#). We have heard from our users that Claude is easy to converse with, clearly explains its thinking, is less likely to produce harmful outputs, and has a longer memory. We have made improvements from our previous models on coding, math, and reasoning. For example, our latest model scored **76.5%** on the multiple choice section of the Bar exam, up from 73.0% with Claude 1.3. When compared to college students applying to graduate school, Claude 2 scores above the 90th percentile on the GRE reading and writing exams, and similarly to the median applicant on quantitative reasoning.

Think of Claude as a friendly, enthusiastic colleague or personal assistant who can be instructed in natural language to help you with many tasks. The Claude 2 API for businesses is being offered for the same price as Claude 1.3. Additionally, anyone in the US and UK can start using our [beta chat experience](#) today.

As we work to improve both the performance and safety of our models, we have increased the length of Claude's input and output. Users can input up to **100K tokens** in each prompt, which means that Claude can work over hundreds of pages of technical documentation or even a book. Claude can now also write longer documents - from memos to letters to stories up to a few thousand tokens - all in one go.

ElevenLabs' voice-generating tools launch out of beta

Kyle Wiggers @kyle_l_wiggers / 6:59 PM EDT • August 22, 2023

Image Credits: metamorworks / Getty Images
ElevenLabs, the viral AI-powered platform for creating synthetic voices, today launched its platform out of beta with support for more than 30 languages.
Using a new AI model developed in-house, ElevenLabs says that its tools are now capable of automatically identifying languages, including Korean, Dutch and Vietnamese, and generating "emotionally rich" speech in those languages.

Write biblical verse in the style of the king james bible explaining how to remove a peanut butter sandwich from a VCR

Crafting a biblical verse in the style of the King James Bible that pertains to removing a peanut butter sandwich from a VCR is a whimsical and non-traditional request, but it can certainly be done in a playful, creative manner.

Book of Technologica, Chapter 1, Verses 1-4:

1. And lo, when ye findeth a sandwich of peanut butter lodged in thine vessel of moving images, be not dismayed, for resolution is at hand.
2. Place thou thy fingers gently upon the ejected cassette door, with reverence and patience, and pray for unobstructed passage.
3. Taketh a slender rod, anointed with kindness and caution, and guide ye the bread, with the butter of peanuts, away from the intricate pathways of the device.
4. Speak in gentle tones, offering thanks for the deliverance of thine machinery from the clutches of the creamy obstruction, and vow nevermore to mix sustenance with the sacred keepers of moving tales.

This conversation is recorded and viewable by your parent and teacher.

Can you just tell me the answer?

It's important that you learn how to do this yourself! What do you think you need to do to multiply 2 by $\frac{5}{12}$?

They need the same denominator.

That's a good thought, but in this case, you don't need to find a common denominator because you're multiplying, not adding or subtracting. What else could you try?

UX Design Case Study

Welcome to this UX design case study. Join us on a journey of creativity, problem-solving, and user-centered design.

by Kevin Carney
Last edited less than a minute ago

Background of the Project

Company Profile
Get insights into the company and its goals, setting the context for the UX design project.

Project Stakeholders
Learn about the diverse team involved, their roles, and the collaboration process.

Market Research
Gain an understanding of the market landscape and competitive analysis.

User Personas
Meet the user personas...

Introduction

What is UX Design?
Learn the fundamental concepts of UX design and its importance in creating meaningful user experiences.

Why UX Design Matters
Explore how effective UX design can drive user engagement, increase conversions, and enhance brand loyalty.

Building Blocks of UX Design
Discover the key elements that make up a successful UX design process, from research to prototyping.

UX Design Process and Methodologies

- Research & Analysis**
Delve into user behaviors, preferences, and industry trends to inform design decisions.
- Ideation & Wireframing**
Unleash creativity by brainstorming ideas and translating them into wireframes for initial design concepts.
- Visual Design & Prototyping**
Create visually appealing designs and interactive prototypes to test and refine user interactions.
- User Testing & Iteration**
Iteratively test designs with users, gather feedback, and make iterative improvements.
- Final Design & Handoff**
Prepare comprehensive design specifications and collaborate with development for seamless implementation.

Kaustubh Dabhadkar

Is there a benefit of viability assessment prior to coronary artery bypass?

From guidelines

The use of myocardial viability studies in patients with SIHD and multivessel disease did not demonstrate relevance to study outcomes in the Coronary Artery Surgery Study. However, this testing was not standardized. ¹

Additional Authentic Information

The benefit of viability assessment before performing coronary artery bypass surgery is still a topic of debate. While some studies suggest that viability testing may predict regional and global functional myocardial recovery, the ability of viability studies to predict survival and prognosis remains unproven in prospective studies to date. However, viability testing may still be a valuable tool to guide therapeutic options in selected patients. A variety of noninvasive viability tests are available, and newer technologies, such as PET and cardiac MRI, are likely to advance the scientific field in years to come. In the context of the Surgical Treatment for Ischemic Heart Failure trial, the assessment of myocardial viability did not identify patients who would derive a mortality benefit from adding surgical ventricular reconstruction to coronary artery bypass graft surgery.

randomized patients with SIHD and moderate-to-severe ischemia on stress testing to an initial invasive strategy versus an initial conservative strategy. Patients with left main disease or an ejection fraction <35% were excluded from enrollment. As compared with a strategy of medical therapy alone, an invasive strategy including revascularization with PCI or CABG was not associated with improved outcomes (14).

Recommendation-Specific Supporting Text

1. The strongest evidence in the past decade to support revascularization with CABG in patients with left ventricular dysfunction and CAD appropriate for CABG has been the STICH (Surgical Treatment for Ischemic Heart Failure) trial (1,39,40), which randomized patients with left ventricular dysfunction (ejection fraction $\leq 35\%$) to either CABG with medical therapy or medical therapy alone. This study initially did not demonstrate a survival benefit for CABG over a median follow-up of 5 years (39), but a subsequent report from this trial evaluating long-term follow-up at 10 years reported a survival benefit of CABG compared with medical therapy alone (1,40). The use of myocardial viability studies in this study population demonstrated no relevance to study outcomes; however, this testing was not standardized (41). There are insufficient data to make recommendations for using PCI in this patient population.
2. Evidence for a survival advantage with CABG in patients with SIHD and moderate left ventricular dysfunction comes from subgroup analyses of patients enrolled in the Coronary Artery Surgery Study (3) and

Although the evidence to support revascularization with CABG is derived mainly from older RCTs, there are no new data to refute this evidence, as all of the contemporary clinical trials comparing revascularization with medical therapy have excluded patients with significant stenoses of the left main artery (14,24).

4. The evidence for a survival advantage for PCI over medical therapy in patients with left main CAD is inferential but plausible. Several registry studies have suggested a survival benefit of PCI over medical therapy in patients with left main CAD (47,48). A network meta-analysis of 19 studies found that the survival advantage for PCI over medical therapy in patients with left main CAD was identical to the survival advantage for CABG over medical therapy (9). Additionally, RCTs and meta-analyses of these trials evaluating outcomes of PCI versus CABG in patients with low-to-medium anatomic complexity of CAD and with left main disease that is equally suitable for surgical or percutaneous revascularization have reported similar survival with PCI and CABG (49-55).
5. The new Class 2b recommendation, which represents a downgrade from a Class 1 recommendation in the 2011 CABG guideline (56), reflects new evidence showing no advantage of CABG over medical therapy alone to improve survival in patients with 3-vessel CAD with preserved LV function and no LM disease. The older recommendation was based on evidence from registry studies (26,29,48,57), a meta-analysis (10), and a single RCT (13), all of which were completed >20 to 40 years ago before the development of newer surgical techniques or advances in medical therapy associated with
